

HealthWay® EMF Air Purification Systems

*The World's First and Only System that
Traps and Kills Up to 100% of All Airborne
Pollutants Containing Viruses, Mould,
Fungi and Bacteria*

THE RECENT LAUNCH OF HEALTHWAY® Air Purification Systems has alerted us to the dangers of poor air quality indoors. According to the US Environment Protection Agency, indoor air has been rated as one of the top environmental public health concerns. Today our indoor environment contains many synthetics and chemicals that did not exist 10 to 15 years ago. These same synthetics and chemicals as well as the shorter distances between homes and buildings, actually contribute to high-level of contaminants in our air, resulting in allergies and symptoms that are associated with bacteria, viruses, mould, fungi, gases and other forms of particulate matter.

Addressing this pressing issue is the leading indoor environmental solutions engineering company, IEQ Global. IEQ Global provides a complete suite of Indoor Environment Quality solutions, using state-of-the-art technology via environmentally-friendly means for everyone to live, work and play in environments that are fully optimized and beneficial for health and performance.

With the introduction of the HealthWay® EMF Air Purification System, IEQ Global brings to Singapore, the world's first and only air purification system with EMF technology that was originally developed in collaboration with the US Department of Defence to combat germ warfare. The patented EMF technology comprises of a unique high energy field that traps and kills up to 100% of airborne pollutants and micro-organisms such as bacteria, viruses, mould and fungi. EMF raises the efficiency of air filter media to 99.99 percent, at 0.3 microns, the most human lung-penetrating particle size, which other types of filtration cannot provide. This can be demonstrated real-time with IEQ Global's particulate measurement counters on request.

As the only air purification system that traps and kills micro-organisms by breaking through their DNA, HealthWay® Systems also eliminate odours left by food and cooking, as well as Volatile Organic Compounds (VOC) such as formaldehydes emitted by wooden furniture, glue, electrical appliance, paint, car exhaust and the haze.

Since its invention, the revolutionary and patented EMF Technology has been awarded the NASA Technology 2005 SBIR (Small Business Innovation Research) Award and the National Research and Development Award (Past Winners include the Automated Teller Machine, the Fax Machine and the Halogen Bulb). HealthWay® EMF Air Purification Systems have been listed by the U.S. Food and Drug

Administration (FDA), as a Class 2 Medical Device. This means they effectively kill and trap almost all airborne viruses and bacteria, with no need for human intervention. Up till the point when the EMF Filter needs to be replaced (in approximately 24 months' time), an indicator light will turn on, prompting owners to call IEQ Global to deliver and install a replacement filter. In the meantime, HealthWay® users will be glad to know that the system emits only the cleanest air possible without releasing potentially harmful substances

such as oxygen radicals and oxidising agents (ozone), which could be harmful to humans.

HealthWay® Air Purification Systems are exclusively, distributed by IEQ Global, the Region's premier indoor environmental solutions engineering company providing innovative Indoor Environment Quality solutions and services for homes, offices, hotels, hospitals, factories, among others. IEQ Global's customer portfolio includes Government Agencies, Multi-National Corporations, local listed and private companies, and home owners.

With IEQ Global and HealthWay®, you know that you have the right to breathe only the cleanest air. ♦

HealthWay® Air Purification Systems emit only the cleanest air possible

The first 30 respondents will receive a complimentary Indoor Air Quality evaluation of their home or office, complete with a post evaluation report. Interested readers should email "Request for IAQ Evaluation" to info@ieqglobal.com OR call +65 6377 1300 (ask for Janice) to make a request.

For More Information: www.ieqglobal.com or call: + 65 6377 1300.
