

AN EXCLUSIVE INVITATION

Announcing a New Solution to Rising Energy Costs: How to Beat It and Stay Competitive in The Hospitality Business

Striking the Balance between Profit and Environmental Sustainability

In today's increasingly competitive global business environment, we know each of our companies are constantly challenged to grow business and maintain profitability in the face of an ever-increasing demand for and dwindling supply of natural resources.

For many, the questions that are most frequently asked are:

- ✓ How can businesses increase profitability with soaring HVAC energy costs?
- ✓ How can companies support the Green Initiative and take a step closer towards achieving GreenMark while still achieving business objectives?

IEQ Global would like to invite you to an **Exclusive Executive Seminar**, where we will be announcing a revolutionary, environmentally-friendly solution on how you can achieve excellent indoor environment quality for comfort and hygiene with manageable operating costs and reduced maintenance effort. Equally significant, our solution has been proven to reduce your energy consumption and cost. For your business, it means increased profitability!
